

The **Unication Alpha Legend Plus Pager Nylon Carrying Case** is an optional accessory for the Alpha Legend Plus pager. The Legend Plus has a holster with built-in belt clip included as part of the standard package, but the attractive black nylon carrying case can be used as an alternative. A protective flap at the top of the case attaches to the front of the case with a strip of Velcro material, securely holding the pager in place.

The carrying case comes in two optional rear configurations. The "Belt Loop" configuration has a rear flap that can be secured over a belt by snapping a pair of metal fasteners together. The "Belt Clip" configuration integrates a sturdy metal clip into the back of the case for sliding over a belt. The Alpha Legend Plus Nylon Carrying Case comes in one size and is compatible with the entire line of Unication Alphanumeric pagers. Along with the Alpha Legend Plus, the case can also be used to

carry the Alpha Elegant and Alpha Elite pagers.
