

The ***Nylon Carrying Case*** for the ***Uication Alpha Elite Pager*** is an optional accessory that can be used instead of the standard holster that comes with every Alpha Elite pager. The case comes in one size, is black in color, and has a top flap that attaches to the front of the carrying case with a Velcro strip, securing the pager in place.

The carrying case has two rear configurations to choose from. The "Belt Loop" option has a rear flap that can be secured over a belt by snapping a pair of metal fasteners together. The "Belt Clip" option has a sturdy metal clip attached to the back of the case for sliding it over a belt. The Alpha Elite Nylon Carrying Case comes in one size and is compatible with the entire line of Uication Alphanumeric pagers.
