The **Stone Mountain Juno Speaker Microphone** is designed to meet the specific needs of the Firefighter. 50% larger than the Sword for ease of use with gloved hands, the Juno also has larger Emergency and Volume control buttons available if desired. The speaker microphone comes with All-Clear microphone and acoustic speaker porting for superb audio quality and maximum performance in wet environments. A huge 57 mm speaker produces clear reception in loud environments. Solderless electrical assembly and dependable gold contacts throughout ensure quality performance.

Rugged, high quality cables in standard 2.5mm, 3.5mm, and 6 pin Hirose accessory interface configurations are available in regular and short cable lengths for maximum operational comfort. Automatic gain control is available, or select a manually adjustable control for optimum microphone sensitivity in all environments. The JUNO is waterproof and comes fully featured to meet the unique challenges of the Firefighting environment.

Stone Mountain is committed to the design and development of innovative and rugged audio accessories for the Land Mobile Radio (LMR) and Public Safety markets. LMR customers are typically users in the public safety and heavy industrial sectors that require top quality and extremely rugged products that can stand up over the long haul. Stone Mountain also specializes in custom solutions for those clients who need unique and specialized communications solutions.
