

**** Contact the office to order this product.**

The **WatchDog Voice Pager** uses a black polycarbonate **Battery Cover** with a metal fastening screw to securely attach itself to the back of the pager. The Battery Cover design provides protection for the battery compartment while also holding the batteries in place. The Battery Covers for the WatchDog and WatchDog LT are interchangeable.

Over-fastening the metal screw can damage the polycarbonate material, but the covers can be replaced. Individual Battery Covers can be shipped without the need to return the entire pager.
