The ***USAlert WatchDog LT Voice Pager Replacement Battery Cover*** is made of black polycarbonate material, protects the Pager's battery compartment from damage and also holds the 3 rechargeable batteries in place. A metal fastening screw is used to securely attach the Cover to the back of the pager. The Battery Covers for the WatchDog and WatchDog LT Pagers are interchangeable.

The polycarbonate material can be damaged by over-tightening the metal screw, so the Battery Covers have been designed to be easily replaced. Individual Battery Covers can be shipped and installed locally without the need to return the entire pager for repair.
